Notes

HOLSTEIN ASSOCIATION TERMS AND CONDITIONS FOR PUBLIC SALES

EFFECTIVE MARCH 2, 1996 - Amended October 1, 1997, June 28, 2000, June 23, 2002, March 26, 2010 and March 24, 2016

TERMS: The terms of the sale are cash unless arrangements are made prior to the sale or are printed in the sale catalog. Only when the above conditions are met will the buyer be entitled to the warranties listed below. In no case will animals be released unless settlement is made with the clerk of the sale.

RESPONSIBILITY: The seller, buyer, and manager of this sale are obligated to comply with the provisions of these terms and conditions.

EXPORT SALES: Buyer assumes all responsibility for health tests required by the importing country.

BIDS: The highest bidder is the buyer. Bidding parties or their agents are responsible for all bids placed. Every animal or lot presented for bidding is pledged to absolute sale. In case of dispute, the animal or lot will again be put up for advance bids, and if there is no advance bid, the animal or lot will be sold to the person the auctioneer accepted the last bid from. In case two or more claim the bid, the auctioneer will indicate the party whose bid he recognized. Other claimants will be given an opportunity to increase the bid and bidding will be restricted to the two or more claimants.

BY-BIDDING: Bidding directly or indirectly by the sole owner of any animal or lot is prohibited unless the intention to bid is disclosed specific to each animal in the catalog and announced when the animal enters the ring. Bidding by any member of a partnership, syndicate, or other entity having an ownership interest in an animal or lot is permitted.

TRANSFER OF OWNERSHIP: For all Registered HolsteinsSM, the transfer of ownership to the buyer will be recorded on the records of Holstein Association USA and a certificate of registration showing that transfer of ownership will be provided to the buyer free of charge. For embryos, the transfer of ownership to the buyer will be recorded on the records of Holstein Association USA free of charge to the buyer.

RISK: All animals located at sale site are at the purchaser's risk as soon as struck off, but will be cared for free of charge for a maximum of 24 hours following the end of the sale.

WARRANTIES:

- 1) Each consignor warrants clear title to the animal or lot, and the right to sell same.
- 2) To the best of the seller's knowledge, each animal is sound and healthy in every respect and embryos have been recovered, processed, frozen, transferred and graded in keeping with IETS recommendations unless otherwise noted in the catalog or announced from the auction stand. Every precaution will be taken to represent the physical condition of each lot exactly as is known. Examination of all purchases should be made immediately after the purchase and before the close of the sale, and if found not to be as represented, complaint must be reported to the sale management before the close of the sale. In the event no complaint is filed, it is understood that the buyer assumes full ownership in the case of animals at sale site together with all risks, after which no representations of the seller can be challenged through the sale management. Heifers that never calved are in no way guaranteed as to the condition of their udders following calving. The sex of an embryo or fetus is in no way guaranteed.

3) Breeding Warranty

The seller guarantees all animals to be breeders, but not beyond the purchase price, with the following understanding:

- a. Males - Should any bull after reaching the age of fourteen months fail to prove a breeder after being used for two months on cows or heifers known to be breeders, the matter shall be reported in writing to the seller within three months of the sale date. The report must include the animal's examination record, a written statement of treatment, and a statement of the animals' inability to breed,

by a licensed veterinarian. The seller has the option to refund the purchase price or make other settlement that is satisfactory to the buyer. In either case the rights of ownership of the animal return to the seller. The seller makes no guarantees with respect to the ability to freeze semen.

- b. Females - All females are guaranteed to be breeders with the exception of:

1. Cows over 7 years of age when sold;
2. Cows and/or heifers carrying a pregnancy that is the result of an embryo transfer.

Report of a non-breeder must occur in writing within 3 months of the date of sale or before the animal reaches 21 months of age and must be submitted to the seller. The report must include the animal's examination record, a written statement of treatment, and a statement of the animals' inability to breed, by a licensed veterinarian. The seller has the option to refund the purchase price or make other settlement that is satisfactory to the buyer. In either case the rights of ownership of the animal return to the seller.

Females bred when sold and pronounced in calf are presumed to be pregnant but pregnancy is not guaranteed unless so announced. The seller makes no warranty that pregnant cows will deliver calves or that they will carry calves full term.

- c. If, after the sale, embryos or oocytes are recovered from a female or an attempt is made to superovulate her, this negates the breeding warranty unless there is a separate written agreement between buyer and seller.

SHIPPING: Assistance will be given in arranging shipping of the animals after the sale. All costs, risks and responsibility will be borne by the purchaser.

PEDIGREE INFORMATION: All production, classification, type and production summaries are current. Only information recorded on Holstein Association USA pedigrees is used. Any production or classification records supplied by the seller or consignor will be properly identified as provided by owner. Records in progress are identified as such.

GENOMIC INFORMATION: If genomic information on the animal or embryo is available, it must be dated and disclosed at or before the time of sale.

EMBRYO TRANSFER: All registered animals that have resulted from embryo transfer are identified with one of the following suffixes in the name: ET, ETS (from split embryo), or ETN (from nuclear transfer). If unregistered, the appropriate technology will be identified. Donor dams are identified.

HEALTH WARRANTY: The seller will provide an official health certificate to the buyer for each animal showing the results of all health tests made in preparation for this sale as required by the state where the cattle reside. Other health tests completed for this sale will be disclosed.

ERRORS: The material in this catalog has been carefully edited. If any errors or omissions are discovered, they will be announced. Such announcements take precedence over that printed in this catalog.

ACCIDENT: The sale management, the consignors, and the owner of the grounds will not be responsible in any case for the condition of the grounds or the behavior of the animals and disclaim any liability in the event of personal accident or property loss.

LIMITATIONS OF WARRANTIES: Warranties contained herein, unless terminated earlier, will cease upon the resale of an animal.

**Testimonial from
Bakake Acres, Grady Auer
New London, WI**

In 2016 I saw an advertisement about RECAL Microbials on the Dairy Agenda Today website. I checked out the RECAL Microbials website and saw a testimonial from another dairyman that I knew. I called that dairyman and talked to him about the RECAL. He highly recommended the product and told me to get in touch with Jamie Troxel of RECAL Microbials. I called Jamie and we discussed RECAL and the next week Jamie came to my farm to talk more about the products. Jamie wanted to look at my ration, cows, forages, and cow manure. He also wanted to hear of any issues I was having with the cows. Jamie wanted to take a look at these things because he said he sees the RECAL working differently on different farms, not all farms are the same.

After Jamie asked me questions about reproduction, production, and dry matter intake he looked at the ration, the forages, the cows and the manure. He advised me that he was sure I was dealing with a mycotoxin issue.

The cows weren't milking like they should, I wasn't seeing heats like I should, reproduction wasn't where it should have been and manure was very inconsistent and not digested very well besides having some bloody gut issues. I was already feeding a well known toxin binder. Jamie gave me a proposal. He would give me enough RECAL Plus for 30 days and if at the end of that 30 days I didn't like it, I didn't have to pay for it. He also told me what to watch for and what to expect the cows to do. He was very confident in the product. He mentioned I could pull yeast and the toxin binder out if I wanted to. I thought what the heck, I didn't have anything to lose since the binder didn't seem to be working, so I took him up on this offer.

The day we started the RECAL Plus Jamie pulled a TMR sample to be sent to Rock River Lab to be tested for mycotoxins and to have a complete nutritional analysis done. The nutritional analysis came back very close to what was on paper, but the vomitoxin level was 3.3 ppm and the T-2 toxin was 134 ppm. Both were high levels. He also performed manure screenings the day we started the product and then came back ten days later and performed the manure screenings again from the same exact cows.

WOW!!! What a difference. Everything Jamie told me to watch for I saw. Within one week I was sold on the RECAL Plus. Milk went up, DMI went up and then dropped back off a little lower then when we started. I started seeing much stronger heats, much more consistent manure and there was a huge difference in manure screenings. You could see a big difference in rumination as well with the use of my rumination meters.

After we started pregnancy checking cows that had been on the RECAL Plus from the time of insemination, my conception rate started going up, a huge improvement! My vet even noticed that we were getting bigger CL's which is a sign of healthier cows and reproduction system. The bigger the CL, the better.

About January 2017 I switched to different corn silage and I was seeing more corn in the manure. I talked to Jamie about that. He said we could try the RECAL Plus SS. It was different than the RECAL Plus and was a fiber and starch digester. So we tried it and in the first week the cows went up three pounds of milk and intakes stayed the same. I was watching my rumination meters and the rumination went up 15% the day after I started the RECAL Plus SS and has held. My %BF has also gone up as well.

We milk about 500 cows near New London, WI. I highly recommend every dairyman to feed the RECAL Plus or the RECAL Plus SS.

Grady Auer
