WELCOME:

Welcome to our complete dispersal.

It is with mixed emotions that we close this chapter at Parklea. We have had the privilege of being part of a dynamic industry, meeting and working with many talented people along the way. We had a very simple strategy at Parklea. Our goal has always been to continue to develop our cow families by utilizing the best genetics available. We were always striving to breed an animal that would score higher and be more profitable than the previous generation while minimizing health issues. For the past 5 years we finished as one of the top 3 herds in the county. We were top herd in 2014. In 2016, we tied for 1st with 12,249kg - 509 - 4.2% - 406 - 3.3% (266-297-278). That's 1122 lbs fat.

We have also produced:

- 51 Superior Production records,
 - 1 Super 3record
- 7 - 100,000kg+ lifetime certificates
- 22 - 80,000 to 99,999 kg lifetime certificates
 - 28 EX or ME
 - 261 VG
- 24 - 1 Star Brood cows
- 12 - 2 Star or 3 Star Brood cows
- 6 - 4+ Star Brood cows

89 animals today trace back to 3 brood cows that played an integral part in winning 2 Master Breeder Shields in 1986 and 2000. Parklea Farms Ltd.'s greatest asset however, has been Tom Mantle, our herd manager for almost 18 years. Tom taught me patience and the value of keeping things simple. I am sure I tested his patience on many occasions. Tom's appetite for knowledge fuelled his attention to detail and cultivated his natural "cow sense". Tom has been more of a member of the family than an employee. Words can not adequately thank him!

We will be honoured by your presence at our sale on October 13th.
Wishing you success with your Parklea genetics' purchases!

Allan & Cindi Parke

To: Potential Buyers at the Parklea Complete Dispersal Sale,

This is a letter in support of Parklea, in regards to the high level of care they provide by implementing proper preventative measures and both meeting and exceeding industry standards. Parklea has been a loyal and highly respected client of the Dundas Animal Hospital, which has provided preventative, reproductive, and emergency services since July 2004. As a whole, Parklea is highly regarded for its superior calf health, providing high quality feed, maintaining a regular vaccine & herd health schedule, and ensuring proper hoof care & cleanliness within the barn. Within the first twenty-four hours of life each calf receives the recommended amount of oral colostrum in order to be immunologically protected. Subsequent feedings consist of free choice GVF Bioforce acidified milk replacer to allow for an accelerated growth rate in order to meet the industry standards of doubling birth weight by the time of weaning. Additionally, each calf receives the Inforce 3 vaccine intranasally at 1 week of age and then again at 2.5-3 months of age to protect against PI3, BRSV, and IBR. When dehorning calves, as per industry standards, a xylazine/lidocaine mixture is administered locally as a corneal nerve block in order to provide longer control against pain when dehorning.

Heifers at 5, 6, and 13 months of age are vaccinated with Express 5 (MLV) and heifers 5 months pregnant or any cow that is confirmed pregnant are vaccinated with Triangle 5 (KV) to ensure proper protection against BVD (type1, 2), IBR, PI3, and BRSV. In terms of hoof care, all of the heifer's feet are trimmed once they are confirmed pregnant and then again prior to calving along with cows who's feet are trimmed twice during their lactation. By following this schedule and providing clean bedding, it has resulted in minimal hoof issues within the herd thereby preventing any negative impact on their overall lactation. Additionally, every heifer that is confirmed pregnant is given a magnet orally in order to reduce the incidence of hardware disease within the herd. Herd health's are preformed on a regular basis in order to ensure that cattle are being bred appropriately in order to maximize on their lactation curve and for early detection of any uterine abnormalities including endometritis, metritis, pyometra, ovarian cysts, etc.

In conclusion, I believe the cattle on the premises to be in good health as a result of Parklea's exceptional herd management skills and high standards.
