

“OPPORTUNITIES FROM PINE-TREE”

Friday, May 8, 2020 • 1:00P.M. EST

-This will be a regular auction, with Dave Rama auctioneering. It will all take place on cowbuyer.com. Be sure to register ahead of time on [cowbuyer](http://cowbuyer.com) or call any of the sale staff from the list below to bid.

-Take time to look through the whole catalog. It is organized by cow families, so there are strong consignments throughout the catalog. In a changing genetic era, keep in mind that the lots here are all available.

-Mixed in with the heifers (and one cow) selling are some IVF lots. The IVF lots sell with a new set of terms; read through them carefully, and we look forward to working with you.

-The Holstein Lots end with two IVF lots from cows that have stood the test of time. Here at Pine-Tree, we have respect for cows that have surpassed the 200,000 lbs. lifetime benchmark.

-After the Holstein lots are six Jersey lots, four Brown Swiss lots, and one Montbeliarde lot. At the end of the catalog are a couple pages of SNAPSHOTS of each live lot. Take a look at them as well.

**Global Cow of the Year 2014*

(Brood cow with many descendants selling)

~Pine-Tree 9882 Prof 7019~

(Relates to Lots 1 thru 6)

A daughter of the prolific OCD Supersire 9882, this Profit daughter has followed in the same footsteps of being able to produce many offspring, with 15 daughters milking already at Pine-Tree. Profit adds strength and power to the mating, a characteristic seen in many of 7019's daughters. The ten daughters of 7019 over 100 days in milk are currently averaging +2704 lbs Milk, +157 lbs Fat, and +130 lbs Protein over herdmates. 7019 herself had a 1st lactation record of 2-04 365 day 39,172 Milk 4.1%Fat 1607 lbs 3.3% Protein 1311 lbs. After significant embryo work during that lactation, she is now due to calve around sale time for her second calf.

Some of the more well-known sons of Profit 7019 are 29HO18960 Acura +2899G and 200HO11186 Pursuit +2860G. In other sections daughters sell from both of these bulls.

Two daughters of Profit 7019 with offspring selling:

-Fortune 7612 is a tall, strong, Fortune daughter with a well attached, youthful udder. At 300 days in milk she is already +522 lbs combined fat and protein over herdmates.

-Medley 7883 is smaller framed than most 7019 daughters, but with above average strength, and a shallow udder. She has three offspring over +3000 GTPI, including her son PINE-TREE 7883 HERO 5628, reg # 3215069802. Her IVF-age Solution daughter sells as Lot #1.

7883 herself is Lot #2, selling open and ready to flush.

Because of the virus situation, our April classification was postponed.

~Sandy-Valley No Limit~

(Relates to Lots 7 thru 15)

In this current era of Holstein breeding, a marked increase in genetic hoarding and restrictions is being observed. Notwithstanding all the benefits lost to others, sometimes we would even hurt ourselves by it. Read on...

No Limit was acquired from Sandy Valley in the fall of 2016 with several objectives. It was felt commercial breeders could benefit from an increase in component percentages, without sacrificing SCS. Another growing concern at the time was the trend toward posty legs and short teats. No Limit's profile seemed to fit and also contribute a low stature option.

Interestingly, No Limit is a grand daughter of the Rudy Missy descendent Pine-Tree Monica Planeta, who was purchased by Sandy-Valley. This makes No Limit a cousin to the famous component improver Sandy-Valley BL Paradise @ Sandy Valley Farms.

No Limit calved in March of 2018, and unfortunately was blind in a rear quarter. Over time however, it became apparent that even if this hampered her appearance and peak production, she could hold her own as a profitable cow, with a 1st lactation record of 365d 26,420 5.2% Fat 1369 lbs. 3.7% Protein 984 lbs. She is currently in her 2nd lactation, testing 6.6% fat & 3.7% protein and due back for her 3rd calf. No Limit's conformation fits well in a commercial setting. She is a low stature cow with a plain front end, but with above average strength, width, and depth. She has a well attached udder and moves freely on her legs.

Currently the highest GTPI daughter of No Limit is Prophecy 7829. 7829 calved in at 1-10 following her heifer ET work, and is currently milking 86 lbs with a 7.0% fat and 3.3% protein. Prophecy (a maternal brother to Profit 7019) added more of a dairy style frame to the mating, but 7829 otherwise fits No Limit's mold of a low stature, deep bodied cow with a well attached udder. Because of the virus situation, our April classification was postponed.

No Limit and her daughter 7829 have already placed over a dozen sons in AI, with likely more to come. Currently one of the higher GTPI sons of 7829 is sired by Sandy Valley Enforce, a grandson of Sandy Valley Morgan Era.

In hindsight, if had not been for "letting go" of Pine-Tree Monica Planeta and thereby letting Sandy Valley develop and breed her to eventually produce No Limit, the opportunity may have been lost to ever have these high component animals back at Pine-Tree.

~Pine-Tree Era Achie 7593-ET~

(Relates to Lots 16 thru 27)

At the same time of the acquisition of the high \$NM heifer Sandy Valley No Limit was Sandy Valley Morgan Era, a late lactation milking donor. She was at the time considered the “less exciting” of the two, which goes to show that our reasoning and intellect often come up short in the test of time.

Pine-Tree Era Achie 7593 was produced from the mating of Achiever on Morgan Era, combining high fat% with a high milk cow. Interestingly, the similar mating of Yoder on Morgan Era had produced the proven sire 7HO12821 Sandy Valley Everest at Select Sires. Of the 5 proven bulls in the breed over 108 lbs of Fat, Everest is the highest for DPR at +.6. Morgan Era and her daughter 7593 have been well above average IVF producers. Morgan Era herself is remembered as a strong willed cow that needed no pampering.

Calving in at 1-10 Achiever 7593, has a record in progress of 299days 29,521 4.8%Fat 1431 lbs. 3.0% Protein 878 lbs. She is already 625 lbs of combined fat and protein over herdmates. 7593 functionally is doing fine in a pen of 220 cows, like the other milking donors mentioned. She is not a large cow, but has good depth of body. She has an udder with the combination capacity and clearance that works for commercial dairy producers and teats that point down. She classified G-79 on her first score, and our April Classification was postponed by Holstein due to the virus situation.

Jeff Ziegler/Select Sires, has seen Achiever 7593 multiple times, and has provided this quote:

“Pine-Tree Era Achie 7593-ET is my vision of what today’s commercial dairyman are asking for in terms of cows made for profitability. I’ve seen her just fresh, and several times throughout her lactation, which has blossomed her into the right kind. Medium to below average stature with exceptional capacity because of her added width, depth and length of frame. Some set to the leg for excellent mobility, and a high textured udder for maximizing production, while minimizing udder health issues. She fits the mode of the invisible cow.....one you don’t remember because you rarely see her. She does everything without added management to maintain her livelihood, yet adds to your livelihood by having her in the barn.”

Her highest son to date is Pine-Tree Tennessee @ ABS with 3034 GTPI and \$1,000 NM.

~Rosylane-LLC Delta 10090-ET~

(Relates to Lots 28 & 29)

ROSYLANE-LLC DELTA 10090 was housed at Pine-Tree for some of her donor career, with some offspring owned by Pine-Tree. Her health traits, components, and extreme low stature combination was appealing. After calving, the observed phenotype closely matched the genomic profile - a shallow, well attached udder, slightly straighter leg, and plenty of width and strength. Delta 10090 was returned to Rosylane in her first lactation. She has placed 5 bulls into AI

Two offspring are currently milking at Pine-Tree Dairy. Rosylane-LLC Frazzled 11270 (dam of lot 29), recently fresh, is a close image of her dam. Frazzled added length of body, will to milk, and more flex to the hock. She is the Dam of the Crane son, Pine-Tree 11270 Crane 766, reg # 3213241736. Modesty 7827 (dam of lot 28) is a smaller cow with a nice dairy frame, and very good udder and feet and legs.

Rosylane-LLC Delta 10090-ET GP-81, VG-MS DOM

~Pine-Tree 7445 Skyw 8177-ET & Pine-Tree Burley~

PINE-TREE 7445 SKYW 8177 is a Skywalker from Burley 7445. Burley 7445 is a maternal sister to 7HO14250 Legacy at Select Sires. She was injured as a calf, and thus never able to calve in.

It is exciting to work with Burley genetics! At this time Burley is the #2 Proven TPI Sire. Burley is a Boastful x AltaOak x O-Style x Ramos Alexia x Boliver. Of note: two of Burley's great-grandams are alive and milking in the herd, and are the 2nd and 3rd oldest cows milking @ Pine-Tree Dairy. They are:

Pine-Tree Leif Suzy, EX-91 (dam of AltaOak), with 274,988 lifetime lbs. She sells an IVF session as lot 41.

Pine-Tree Ramos Alexia, EX-93 -the direct maternal great grand dam, with 248,818 lifetime lbs.

~Meadow Green Abso Fanny-RED-ET~

Nathan Thomas brought MEADOW-GREEN ABSO FANNIE-RED EX-96 to our satellite (Trans-Ova) facility for aspiration a couple times. We appreciated her moderate stature, while still having great balance throughout. But we also noted her own fertility with getting pregnant easily and being youthful in appearance.

We purchased an IVF from Fannie, and choose to use 29HO18285 Splendid-P*RC. MS PT FANNIE SPLE 7709-ET*RC is that combination. She is milking 1st lactation, pregnant from her first service (566HO1312 Redlight-RED), and due 9/29/20 for her 2nd lactation. Because of the virus situation, our April classification was postponed. 7709 is a promising young black cow with a well-attached udder. Her natural calf by Mark*RC sells (Lot #39), a RED 9/19 granddaughter of MEADOW-GREEN ABSO FANNIE-RED.

“OPPORTUNITIES FROM PINE-TREE”

~Oaklane Chisel Della 2130~

(Relates to Lots 42, 43 & 44)

In the Spring of 2016, a donor at the River Valley Rendezvous piqued our interest: Oaklane Chisel Della: The heifer seemed to check a lot of boxes for us (high DPR, fat and protein %, JUI, ready to flush); but we were informed that she looked a bit round. The purchase was made anyway, and Chisel Della was moved from Oak Lane, SD to Pine-Tree, OH. The IVF work done while at Pine-Tree has made a significant impact on our Jersey breeding program, including putting 7 sons in AI. Chisel Della was re-sold that fall at the Top of The World Sale to David Allen of Wisconsin.”

Della descends from the component-rich “Maid” cow family, largely from Sunset-Canyon. The foundation of the family was the Tenn Haug E Maid cow, sired by ISDK FYN Haug. FYN Haug was born in 1981, and his current index includes the following PTA values: +.60% Fat +.19% Protein +3.6 DPR +2.3 Liv -20 JPI (higher than 64 bulls listed on the April 2020 Bullseye program)

Given the benefits the Jersey breed has received from the symbiosis of the Maid family and Danish sires, it seemed fitting for the first offering to be a daughter the Danish sire VJ Dee.

"OPPORTUNITIES FROM PINE-TREE"

~Butter Valley Zuma Saw~

In looking for Jerseys with high protein percentage, a local source turned up an interesting cow family. Phil Miller's herd, Butter Valley from Sugarcreek, Ohio. We visited his herd and purchased the 2nd lactation Butter Valley Zuma Saw, because of her component %s. Selling is an IVF from a Chrome x Disco x Dimension x Zuma Saw. Behind Zuma Saw is this sire stack: Impuls x Paramount x Cheese Yield. Cheese Yield was bred by Phil Miller, a son of FYN Haug who was referenced on a previous lot. Butter Valley Cheese Yield's current proof stands at: Fat +0.42%, Pro +0.14%, SCS 2.55, DPR +5.6. Note that the Donor selling an IVF seems to reflect these same strengths:

“OPPORTUNITIES FROM PINE-TREE”

~R Hart Brookings Atlanta~

R HART BROOKINGS ATLANTA was purchased from Alan Rinehart in 2015 as a milking 2nd lactation cow for several attributes that it was felt the Brown Swiss breed needed. She was a good embryo producer, and was positive for % fat and protein, as well as good DPR. Her 2nd lactation record was at that time one of top ECM records for any breed in our herd

Atlanta was flushed to Driver, a sire proven to also transmit components and fertility. Two Driver daughters resulting are now both VG cows in their 2nd lactation, that have had an impact on the Brown Swiss program. Three bulls in the top 25 PPR in the Brown Swiss breed are sons of these two cows (11BS700 AltaFizzy, 29BS3821 Hamnswiss, 551BS1427 Alloy). The Drivers are both smaller stature cows with good feet and legs and well attached udders. Their daughters sell by Dynamite (#1 NM Dynamite) and Kade (possibly the #1 Polled female of the breed).

Archer was used on Pine-Tree Driver Allie to further accentuate the DPR, resulting in Archer 7970, now fresh, has a Silver daughter selling (possibly #2 PPR Silver daughter)

“OPPORTUNITIES FROM PINE-TREE”

**~Purebred Montbeliarde~
Pine-Tree Gargano Maryalyx**

(Gargano x Hummer x Valfin JB x Sir x Masolino x Faucon)

In 2014, a trip was made to Canada to view some of the few purebred Montbeliardes in North America. Imported as embryos from France around a decade prior, they were bred and developed at a grazing dairy in Ontario. Three heifers were purchased and imported to Ohio to serve as the foundation for Pine-Tree’s Montbeliarde program. The production potential from Montbeliarde x Holstein crossbreds has been well documented in various studies. Although the purebreds perform at a slightly lower level, they are still a welcome addition to the milking herd. Last milk test 8 cows averaged 76 lbs with a 5.0%Fat and 3.5%Protein.

Selling (Lot # 52) is a 12/4/19 calf sired 256MO2100 Gargano from a 2nd lactation 256MO4279 Hummer with several maternal brothers in AI. This heifer traces back to the same cow family in France that produced the popular bull Redon.
