In addition to siring offspring without horns, these bulls correct some major concerns in the breed today. They sire ideal to sloped rumps; ideal set to some curve in rear leg and ideal to longer teats. You CAN have it all!

EMBRACING POLLED GENETICS

Prepared by Bonnie Cooper

What is the fastest growing segment in dairy cattle breeding today? In a word...Polled. While Polled, or naturally born hornless dairy animals, have been around for decades, dairy producers worldwide are showing renewed and sustained interest and use of Polled genetics in their breeding programs.

Why? For many dairy producers, Polled animals are desired for personal safety, animal health and financial reasons. Rising public awareness and disdain for the practice of dehorning is also prompting a shift towards Polled. Combine that with the growing number of high ranking, top performing Polled cows and bulls in the breed and it is easy to see why the popularity and use of Polled genetics is rising.

The gene for Polled is dominant over the horned gene, meaning animals with one copy of the Polled gene and one copy of the horned gene will not have horns. This makes it faster to make more Polled animals than if the Polled gene was a recessive. Animals can have one of two combinations for the Polled gene: PP – homozygous Polled, the animal has no horns and all offspring will be born without horns; and Pp –heterozygous Polled, the animal does not have horns, but their offspring may or may not have horns depending on their mate.

The presence of the Polled gene is coded on Official pedigrees and registrations by Holstein Canada as: POS – indicating a homozygous Polled (PP) animal; POC – a carrier of Polled or heterozygous Polled (Pp) animal; POR – an animal born hornless but not genetically tested for the Polled gene; and POF – free of Polled.

The beef industry has been focusing on Polled genetics for years. Back in 2017, 89.3% of Western Canada and 86% of Ontario cow-calf producers were already reporting that 75% of their calves were Polled.

While the uptake of the Polled gene in dairy cattle has been slower that is now changing worldwide. In Australia, for example, the combined sales of daughter proven and genomic Polled semen grew by 52.6% in 2020. Polled genomic semen sales increased by 47%. Graeme Gillan, Chair of the National Herd Improvement Association of Australia, has said, "The increase in use of Polled semen is driven by health and safety factors, animal welfare and production efficiencies. It is indicative of a real focus on Australian farms of improving production efficiencies and developing sustainable breeding strategies."

**It currently costs
from \$25 to \$30/head
to dehorn a dairy
animal in Canada**

In Germany, Polled bulls (PP and Pp) accounted for 21.8% of all Holstein (Black & White and Red & White) inseminations in 2019, an increase of 4% from 2018, with PP inseminations accounting for 14% (+4.2%). Breaking that down further, Polled bulls accounted for 18% of B&W inseminations and 46.4% of R&W inseminations. In 2020, the two most used B&W Holstein bulls in Germany were

both PP ("Merian-PP" and "Bobest-PP"), while in the R&W it was a PP ("Rambo-PP") and Pp ("Solitair-P") bull that led the way.

Polled genetics eliminate the costs, labour, animal health and welfare issues associated with dehorning. It currently costs from \$25 to \$30/head to dehorn a dairy animal in Canada under proper protocols according to figures compiled from veterinarians. Canada's Code of Practice for the Care and Handling of Dairy Cattle requires that pain relievers be used when dehorning. Research at the University of British Columbia, however, has found that despite these efforts calves still suffer painful memories and display negative emotions and pain related behaviour, like head shaking, rubbing and restlessness, for at least 24 hours after hot-iron dehorning.

Stanton Bros. Limited, Ilderton, ON, is one of many Canadian breeders incorporating Polled genetics into

their breeding program. "For us, there is value to Polled. It makes sense," says Jim Stanton. "You not only save money and time by not having to dehorn, but it is hard to paint a pretty picture of dehorning no matter what you do. So from a consumer standpoint and image we see Polled as a big plus." He continues, "Polled genetics are really on the upswing. Not only has their genetic level come up, but the diversity in Polled is increasing too. There are lots of non-Polled bloodlines getting a shot of polled." Stanton goes on to say, "We are using Polled

'MIRAND-PP' ranks in Holstein Canada's Top 10 Sires At #9

bulls on some of our higher indexing cows. We probably have 75-80 embryo pregnancies coming that are potentially homozygous Polled. We used 300 to 400 doses of Polled semen from October 2020 to February 2021. Much of this sexed Polled semen." A young Polled cow drawing lots of attention in this large, Master Breeder herd is Stanton's Bighit Melody (VG-85-2y), a high indexing "Bighit P" daughter from the farm's Sonray-Acres Soc Observer VI (Ex-91-2E-10*) family. Melody has a high GPA LPI, Polled "Cockpit" daughter and a Polled "Cockpit" son heading to A.I. "Polled is something we really believe in and are excited about," says Stanton. "We are going to keep on trying to get as many Polled animals as we can, with our ultimate goal being to make some really nice homozygous Polled bulls so we have more chances to make Polled."

Enhancing the growing acceptance of Polled genetics today are cows like Calbrett Kingboy Miranda P (Ex-93-1*) owned by Vogue Cattle Co., Brighton, ON. Sired by "Kingboy", Miranda is a daughter of Snowbiz Ladd P Marshmellow (VG-87-9*), a former #1 homozygous Polled female in the world. In 2020, Miranda was a finalist for Holstein International's "Global Cow" and "Red Impact Cow" of the year, the only cow to be nominated for both awards. Miranda is the dam of Coomboona Zipit Mirand-PP, perhaps the most outstanding type bull the Polled sector has ever seen. "Mirand" offer the total package of high type, solid production, A2A2, Red

Factor and Polled. Born in Australia, this "Zipit" son is the result of an embryo that was exported by Vogue to Coomboona Holsteins. In 2020, "Mirand" became the first homozygous Polled bull to ever rank in Holstein Canada's Top Ten Sires for most registrations in a year (at #9). In a Holstein International breeder survey of the most used bulls for breedings in the world during the first five months of 2020, "Mirand" placed #1 among genomic bulls and #2 overall. A Red & White maternal brother to "Mirand", Vogue Redeye P, is garnering a lot of notice currently because of his high type, A2A2, BB and colour. Two of Miranda's "Loyola-P" daughters are also beginning to have a huge influence on the Polled sector through their sons. Vogue Loyola Mudslide-P (VG-87) is the dam of high type bulls Vogue Illustrator-P and Vogue Picasso-PP (who has a double cross to Miranda being a son of "Mirand"); while Vogue Loyola Macy Red-PP (VG-88) is the dam of Vogue Webcast-PP.

Producing an exciting Polled line right now is Silverridge Duke Elsa-P (VG-87). This "Duke" x "Powerball-P" daughter is owned by Vogue and completes 16 generations of Very Good or Excellent in the Wabash-Way Evett (VG-86-DOM-27*) family. Elsa already has produced two #1 PP bulls with Vogue Eclipse PP and Vogue A2P2-PP. On the female side, she has one of the highest milking PP cows on an LPI and TPI basis in Vogue Sammy Everclear-PP (VG-87-2yr).

Another cow destined to have an impact on the Polled sector is Vogue Splendid Samara-PP (VG-86-2yr) owned by Vogue and Silvercap Holsteins. A 14th generation Very Good or Excellent in the Des-Y-Gen Planet Silk (Ex-90-10*) family, Samara is a "Splendid-P" daughter from an Excellent-90-1* "Powerball-P" dam. Samara is the dam of two #1 PP bulls - Vogue CFP-PP, the #1 PP bull in Australia, and Vogue Nipit-PP, the #1 GTPI PP bull in the world (December 2020). A third son, Vogue 2020-P, is high ranking in multiple countries. All three bulls are A2A2 and carry the BB gene (the desired beta casein gene for cheese) which is a major selection criteria in cheese producing countries like Italy and Switzerland and also a growing market segment. Samara also has a "Mirand" daughter, Vogue Mirand Red Wine-PP, who was the #1 Red & White PP female on the December 2020 GTPI and GPA LPI lists.

With all the benefits Polled genetics can bring to your herd, isn't it time you embraced Polled?

Miranda:

Rising Star for Polled and Red

He has become a global superstar in the polled breeding sector, the Australian bull Coomboona Zipit Mirand-PP, perhaps the most outstanding type bull the polled sector has ever seen. He combines solid production with all the extras including A2A2 and the red factor. Now another exciting prospect is entering the market, a high-type Canadian red bull Vogue Redeye-P-Red, who is also A2 and BB. What do these two bulls from the opposite sides of the world have in common? Their VG-88 1st-calver dam, Calbrett Kingboy Miranda-P.

DOUG SAVAGE

Miranda is one of those no holes, moderate sized cows, nicely balanced and with an impressive udder, comments Dave Eastman from Vogue Cattle Co. in Ontario. 'She scored VG-88 on her first lactation and is really the modern kind of cow. She is milked in a robot barn and is due with her third calf in the spring.' Vogue is a partnership between Dave Eastman and O'Connors at Ajax, Ontario, where Miranda is housed. 'We've now got three milking daughters, two of which are VG 2-year-olds and both are homozygous polled, while there are quite a few younger heifers too. All her offspring are stamped with her type pattern, with hard tops and wide rumps.'

PICTURE COW

The mother of Miranda, Snowbiz Ladd-P Marshmellow, sold in the fall of 2013 as a choice of a flush and at the time was the Nr.1 homozygous polled female worldwide. She attracted big money, and was purchased by a syndicate consisting of Canadians Cormdale and Silvercap, along with Italians Agriber and Al-Be-Ro. Marshmellow was flushed extensively and today her progeny list includes two EX and 10 VG daughters. One of those EX daughters is a full sister to Miranda, Calbrett Kingboy Moonlight-P EX-91, who is also at O'Connors and has often appeared in the Kingboy advertising.

HOMOZYGOUS POLLED

'We flushed Miranda 5-6 times as a heifer and a number of resulting embryos were exported to Coomboona in Australia,' continues Eastman. Her OCD Eraser Zipit embryos only produced results in Australia... with the bull Coomboona **Mirand-PP**. This homozygous polled bull with 2419 gTPI, 1444lb milk and 3.63 type is proving

Miranda's daughter Vogue Loyola Macy-Red-PP VG-86; her Webster son should have semen available in the coming months.

Calbrett Kingboy Miranda-P VG-88: Dam of Mirand-PP and Redeye-P-Red.

extremely popular in various countries: Udders are outstanding at 5.09 rear udder height and 4.68 wide, and the pedigree is Apple-free! In Canada, where he is +14 type, he already has sons as high as +17! Vogue **Picasso-PP** (3028 gLPI 1543kg -.05% -0.7% 17 type) is actually double Miranda; sired by Mirand and out of Miranda daughter Vogue Loyola Mudslide-P GP-84. Another Mudslide son is Vogue **Illustrator-P-RC** (3090 gLPI 1398kg +.17% +.03% 11 type), a Luster son that is now 12 months old. A full sister to Mudslide, Vogue Loyola Mariposa-PP GP-84, is dam of the Drastic-P son Vogue Memphis-PP (3151 gLPI, 702kg +.13% +.16% 12 type) who is the Nr.1 type bull in Australia at 111. And a third full-sister, Vogue Loyola Macy-Red-PP VG-86, has a homozygous polled red-carrier son sired by Progenesis Webster that is approaching 12 months old and has numbers of 3247 gLPI, 1616kg +.07% +.03% and 10 type. Between them, these four polled bulls – all out of daughters of Miranda – are set to make quite an impact on polled breeding! A Webster-P son direct from Miranda, Vogue Redeye-P-Red (3235 gLPI, 1267kg +.15% +.03% 12 type), is already attracting attention at Semex.

BACKGROUND

In the summer of 2001, the Arron-Doon and West-Port herds from Ontario jointly purchased some cows from one of the pioneer polled herds in the US, Hickorymea Holsteins, owned

by the Johnson's in Pennsylvania. One of the young cows was a GP 2-year-old out of a polled red VG-86 Kinglea Leader daughter and sired by Windcrest Leadman Judge. This young cow went on to score VG in Canada and established the line that now leads to Miranda. Her September grand-daughter West Port Arron Doon Mit-P-Red became the dam of the bulls Mitey-P (<Goldwyn) and Magna P (<Bolton). With Redeye-P-Red and Mirand-PP already creating excitement, and a sizable group of bulls from the next generation soon to follow, the Miranda family is set to make quite an impact in polled and red breeding. ●

4.3% F 3.7% P and RC / A 2A2 / BB
Completes 14th generation of VG or EX

The future is here

Samara's sons dominate various international rankings. Their genetics deliver TODAY what we believe will be industry standard within 10 years or less: consumer friendly genetics that produce sought after caseins A2A2 & BB & without horns. You CAN have it all....NOW. Contact us for semen or embryos.
